

## **Profitool 6.1.15 Recently Released**

Denver, Colorado – May 5, 2010 – Profitool, a leading developer of construction management software, announced today that Profitool 6.1.15 was recently released. The release offers many new web enhancements that are now a part of this very powerful construction accounting and job cost software application.

According to Pete Armstrong, business development representative for Profitool, Inc., “The latest release of Profitool 6 offers a Project Management Module, InfoLinks, enhanced reporting capabilities, the ability for users to create a variety of different screen looks, and more.” Armstrong goes on to say, “As part of Profitool’s product launch, we will be attending the [2010 CFMA Conference and Exhibition](#) in Kona, Hawaii. For those attending the conference, we encourage them to stop by our booth, #126, and see the latest version of Profitool 6.”

### **About Profitool**

Profitool 6 is a product of Profitool, Inc. For more than 30 years, Profitool has provided specially designed accounting and job cost software for the giants of the construction industry. Today, they design, develop, implement, and support software products that are geared for construction companies of all sizes. Profitool’s products help companies track costs and manage equipment and projects more efficiently. In construction, good information is the key to success.
